Worked as Software Engineer. Created web Application Using Angular 8, Node.js, Express.js, Mongo DB. Html, Css. Writing SQL Query's using MySQL and Generating Reports using Birt, Tableau tools

PROJECTS

Knowledge Pro

Knowledge Pro is designed for educational institution, autonomous colleges and universities to simplify the needs of college administration. The software helps in keeping a track of student complete academic details from application submission to course completion and the alumni details too. The software not only helps in keeping a track of student activities but also helps in maintaining staff details right from recruitment. The solution also take care of the time table generation, asset management, examination, fee payment and more. It also includes features such as online payment, SMS, email response, Parents/Students portal and much more.

Role:-

- Worked in the front end and back end on the modules like Admin, Admission and Attendance. Using the Angular 8, Node.js, Express.js and MongoDB.
- Worked in the front end and back end on the modules like Admin, Teacher, Admission, and Attendance. Using the Angular 8, Node.js, Express.js, and MongoDB.
- Summing up the requirements and designs for the report and decide on how the query has to be built in order to achieve client format.
- Develop parameterized basic, consolidated and tabulated student attendance reports, annual marks sheets,
- Tabulated employee bio-metric and appraisal reports that would suffice the need of the client.
